

**Table of Characteristics of AVRDC-Developed Onion Lines**

Lines	Bulb color	Bulb size	Bulb shape	Uniformity	Storability	Chilling requirement for bolting	Yield (t/ha)	Bulb weight (g)	Days to maturity
AVON1016	Red	Medium-large	Globular	Very uniform	Poor	High	46.8	217	147
AVON1027	Yellow	Large	Globular	Uniform	Poor	Medium	45.3	255	146
AVON1028	Yellow	Medium-large	Flatten globular	Uniform	Good	High	40.5	191	145
AVON1052	Yellow	Large	Globular	Very uniform	Medium	Medium	52.5	239	119
AVON1074*	Red	Small-medium	Flatten globular	Uniform	Medium	Low	18	40-100	130
AVON1103	Red	Small-medium	Flatten globular	Uniform	Good	High	39.9	173	147

Average quantitative data were measured during cool seasons at AVRDC, Shanhua, Taiwan

\*Line was selected under West African condition.
