

Sweet Pepper

Lines developed at AVRDC – The World Vegetable Center

AVPP0701(PP0737-7016)

Pedigree: Midway seln/Peto Wonder seln.

This recently developed line has been selected for high yields, and good flavor; the large oxborn shaped fruit is sweet with thick fruit walls, and may be consumed fresh, or cooked at green or red maturity. The variety does not carry any special host plant resistance, but some heat tolerance. It is included as an entry in our most recent International Sweet Pepper Nursery.

Buy AVRDC seed

Seed of this and other selected vegetable lines developed at AVRDC – The World Vegetable Center is available for purchase.
