Hot Pepper

Lines developed at AVRDC – The World Vegetable Center

AVPP0105(PP9950-5197)

Alternative Name: CCA321.

Pedigree: Kulim/HDA248.

Resistant to four diseases, this heat tolerant, early maturing, high yielding, compact variety has found good adaptation in numerous tropical locations and seasons. It also has shown good combining ability in hybrid varieties, and has been used as a parent in numerous recent breeding activities.
