

## Hot Pepper

Lines developed at AVRDC – The World Vegetable Center

### AVPP0512(PP0537-7541)

**Pedigree:** Jin's Joy//Kulim/HDA248.

This line yielded as well or better than commercial hybrid checks in both cool and warm seasons, possibly due to its compact growth habit, short internodes, and intense early flowering habit, which concentrates its yield into a short, intense harvest period. It also displayed resistance to three viruses (CMV, CVMV, and PVY) and partial resistance to Bacterial wilt.
