

Vegetable Breeding Consortium ANNUAL WORKSHOP

16-17 May 2018

World Vegetable Center Headquarters, Taiwan

The APSA/WorldVeg Vegetable Breeding Consortium Annual Workshop will change the way you do breeding and business:

- Learn about the latest developments in breeding research from the WorldVeg team of internationally renowned plant breeders
- Scout field trials of improved breeding material to enhance your cultivar catalog
- Meet breeders, pathologists, entomologists, a genebank manager and other researchers to strengthen your knowledge network*

*Available for individual meetings on 18 May by appointment

Who should attend?

Participation in the workshop is open only to registered APSA/WorldVeg Vegetable Breeding Consortium companies. Consortium membership includes free workshop participation for one representative from each consortium company (includes lodging, meals, workshop materials, coffee breaks, and transportation to/from Kaohsiung Airport or Tainan High Speed Rail Station).

Attendance fee for each additional participant: US\$600.

Featured crops

TOMATO

- 10-15 newly developed and previously released elite fresh market and dual-purpose tomato lines with TYLCD, bacterial wilt, and fusarium wilt resistances*
- 5-8 entries of new TYLCD, bacterial wilt, and late blight resistant fresh market tomato lines under evaluation in a preliminary yield trial (PYT)

CUCURBITS

- 8 newly developed bitter gourd lines with cucurbit powdery mildew (*Podosphaera xanthii*) resistance and possessing good fruit quality*
- 4 previously released elite bitter gourd lines possessing traits of high yield, good fruit quality and resistance to cucurbit powdery mildew*

PEPPERS

- 8 newly developed lines of hot pepper and sweet pepper (4 each) with multiple disease resistance (Potato virus Y, *Phytophthora capsici*, chili veinal mosaic virus, tomato mosaic virus and bacterial wilt)*
- 24 previously released elite lines of hot and sweet pepper (12 of each)*
- 48 entries of hot and sweet pepper yield trials lines with multiple disease resistance

*Seeds of all these lines are available for immediate distribution to Consortium members!
